

I. READING COMPREHENSION (8 marks)

Read the text then answer the questions.

- ① Tom was 12 when his parents decided to buy him a personal computer, thinking it could help with his homework. Tom quickly discovered the Internet, chat rooms and online games. At first, his parents controlled him regularly to make sure he was surfing the Internet safely. But weeks later, they stopped monitoring his online activities.
- ② So, Tom was happy to spend all of his free time in his bedroom, chatting with friends and playing computer games. His school marks became bad but he never cared. He enjoyed being alone and was nervous when his parents asked him to spend some time with them. It was clear that Tom was an Internet addict.
- ③ For many children like Tom, surfing the Internet for a long time without parental control increases the risks of addiction. Too much Internet use can lead to obesity, headaches and other health problems. It can also lead to violent behaviour among children addicted to violent movies and games.
